

# Parking Management Cloud Application

---

This PaaS application was built as part of the lecture "Cloud Application Development" at HTWG Konstanz. A demo version is available [on Google Cloud](#). The repositories and sourcecode can be accessed [on GitHub](#). Students involved in the development:

- [Maren Franke](#)
- [Elisha Leoncio](#)
- [Nico Riedlinger](#)

## System Architecture

The system's architecture is split into Frontend and Backend, consisting of several microservices. Also part of the backend is a NoSQL database, hosted by Google Cloud Firestore.
